Apply HTML, CSS, and JavaScript without third-party libraries (e.g. Bootstrap, jQuery) to complete a web page which meets RWD layout requirements described below:

Requirement 1: 1200px < screen width <= 1920px

Details:

- Ignore red annotations in the screenshot.
- You should check the layout in screens wider than 1200px.
- Base text size is 20px. Welcome text in the light-blue section is twice the base size.
- Title in the navbar should be aligned to the leftmost of the entire screen.
- Menu items in the navbar should be aligned to the rightmost of the entire screen.
- Title and menu items should be vertically centered with each other.
- Welcome text should be horizontally and vertically centered.
- Layout of main content should be fixed in 1200px width, and centered horizontally. Just leave both sides blank.
- Visual borders of Items in the main content should be aligned with each other.
- Spacings of items in the main content should be 20px.
- **Small Boxes:**
  - There are 3 small boxes located in the top of main content where each box should be 50px height and cover ⅓ of total width.
  - Image in the box should be aligned to the left with 80px width and full height. Text in the box should be aligned to the left and vertically centered.
- **Big Boxes:**
  - There are 10 big boxes located in the bottom of main content where each box contains 1 arbitrary background image, 1 star icon, and 1 line text.
  - Arrange these 10 boxes into 5 columns with the same height.
  - First column should be twice wider than the others covering ⅓ of total width.
  - Text block in the box should be semi-transparent and aligned to the bottom.
  - Text should be horizontally and vertically centered in the text block.
 - Star icon in the box should be aligned to the top-right corner.

- Any image should maintain its original aspect ratio regardless of display size. (Image can be cropped without changing the aspect ratio.)
- In any size of screens, width of page layout cannot exceed screen width.
- Make the layout the same as the screenshot as possible as you can for any undescribed detail.

Requirement 2: 600px < screen width <= 1200px

Details:

- ~~Layout of main content should cover 90% of screen width.~~
- **Small Boxes:**
  - ~~Arrange 3 boxes into 2 rows where 2 columns in first row and 1 column in second row.~~
  - ~~Each column in the first row should cover 50% of total width.~~
  - ~~The column in the second row should cover 100% of total width.~~
  - ~~Image in the box should be 80px width and 50px height.~~
- **Big Boxes:**
  - ~~Arrange 10 boxes into 4 columns with the same height.~~
  - ~~Each column should cover 25% of total width.~~
  - ~~Leave only 2 boxes in the last row and each covers 50% of total width.~~
- ~~Any image should maintain its original aspect ratio regardless of display size.~~

Requirement 3: 360px < screen width <= 600px

Details:

- ~~Replace menu items by a burger menu icon.~~ (https://www.iconfinder.com/)
- ~~Burger menu icon should be vertically centered with the website title.~~
- ~~Show the popup menu as screenshot below when we click the menu burger icon.~~
- ~~Close the popup menu when we click the cross icon in the popup menu.~~
- ~~Layout of main content should cover 90% of screen width.~~
- **Small Boxes:**
    - ~~Arrange 3 boxes into 1 column with full width.~~
- **Big Boxes:**
    - ~~Arrange 10 boxes into 1 column with full width.~~
- ~~Any image should maintain its original aspect ratio regardless of display size.~~
